

My input regarding the Low-Income Tax Credit Program that MSHDA administers is:

I agree that at least thirty percent of the annual tax credit authority should be set-aside to develop housing for the homeless and/or special needs population, and that at least 10% of the units in all developments should be targeted to incomes at or below 30% area median income for those who are homeless and/or have special needs.

If we are going to end homelessness in Michigan, then we need to make policy changes and/or change programs so that services are geared toward this population. Providing more dollars for actual housing for homeless individuals and families will assist greatly in our goal to end homelessness.

Thank you.
